Key skills

Node

Express

React

Material-UI

Swagger

MongoDB

JavaScript / ES6

HTML / CSS

Summary

Web Developer with 2 years of experience working on both the Front end and the Back end, building customer-facing eCommerce websites and the systems that they run on. Solution driven with a desire to learn new skills and advance to the next level as a programmer. Able to operate mostly autonomously if needed, but has strong communication and interpersonal skills and is not afraid to ask for help if a problem requires a more senior engineer.

Experience

2020–Present *Full Stack Web Developer* | SunSh1n3 Studios

- Designed, wrote, and tested back-end APIs and Micro Services for both internal and external consumption using Node, Express, and Swagger.

- Worked with the design team and followed design documents from Adobe XD to create eCommerce websites using React and Material-UI.

- Created several Proof-of-Concept projects, experimenting with new languages and frameworks – including Golang, Unity/C#, and Next.js – and reporting my findings and opinions to senior developers.

- Tested, debugged, and refactored both my own code and that of my coworkers, using testing frameworks like Mocha and Chai, and Git for Version Control.

- Explored potential ways to design and implement new features, and improve existing ones, including discovering libraries to use for specific tasks (or deciding we should write what we need ourselves), reorganizing file structures, and removing old and unneeded code.

Education

2019 FreeCodeCamp.com

Full Stack Web Developer Certification

FCC is an online curriculum that guides users through learning Web Development, including HTML, CSS, and JavaScript, as well as several JavaScript libraries and frameworks.
